

Undelete Customer Testimonials

“We have a process where our clients 'upload' billing files to us for processing. Due to PCI compliance we have to receive the file, seamlessly move it to the Secure lan segment and delete it off the DMZ Web Server. The successful moving of the file fails when there is a breakdown across the network, for whatever reason, but the Local Delete always works. So instead of having to call the client and have them re-upload the file, we simply go to Undelete, recover the file and move on. No company likes to call the customer to ask them to take action to solve an internal technical problem. Undelete works.”

KEM SISSON
PRESIDENT
MONEY MOVERS INC.

“Zero-day-deletes [where a file is accidentally deleted after the last backup/snapshot was taken] are where Undelete has worked like a champ for Elite over the years. Not only that but being able to provide the last several versions to a person so they can piece something together because they did not realize they had been messing up the document.”

ROB FREDRES
IT/IS DIRECTOR
ELITE ELECTRONICS

“Undelete Server has been a great product! While system backups are mandatory, often times when files are deleted from a server, hours are still lost on data from work performed after that last snapshot and the time the files are deleted. When files are accidentally deleted it's very fast and easy to restore them from the same exact location they were deleted from with Undelete.”

RICK RODERY
VP OF INFORMATION TECHNOLOGY
SAULSBURY INDUSTRIES

“Undelete has made my job easier because users often create or copy files on the network share folder and delete it between backups...Undelete helps to repair these files any time it was deleted.”

MAXIM SYRBU
SYSTEMS ADMINISTRATOR
NAYADA

“We use Undelete so often that almost all of our users know we have it, and count on it, to save them time in recovering files or folders that were accidentally deleted.”

JOHN BRIGAN
SR. INFRASTRUCTURE ANALYST
MARION COUNTY BOARD OF COUNTY COMMISSIONERS

“I give Undelete a 10 out of 10 for ease of installation and use. The quick retrieval of deleted items makes my job easier. I would recommend Undelete for every system.”

KIM PROPER
IT/IS MANAGER/DIRECTOR
TECHLAW HOLDINGS, INC.

“Excellent for quick recovery instead of having to go straight to disk or tape backups. The versioning has saved us by minimizing the amount of time getting our users back to work. We used it in the past when users say ‘we did not delete the file’ when Undelete indicates who and when the file was deleted.”

ISRAEL PONCE-RODRIGUEZ
IT/IS DIRECTOR
UAB DEPARTMENT OF PATHOLOGY

Undelete Customer Testimonials

"We use this tool constantly, and has been very vital in several situations where executive staff had been working on a presentation or spreadsheet for an hour or more and somehow deleted it and called our help desk to see if we could recover a file they had just created and accidentally deleted it. The ability to recover that file has been crucial and being able to provide the customer service with immediate results is great"

STEVE LAUER
SR. SYSTEMS ADMIN
MARICOPA COUNTY CLERK OF THE SUPERIOR COURT

"Undelete is a great product. It has saved our lives numerous times over the years."

ANONYMOUS ENGINEERING COMPANY

"We have used Undelete for a number of years and the product works very well with little issues. It's especially helpful during tax season."

ANONYMOUS FINANCE AND INSURANCE COMPANY

"I have been using Undelete for many years and staff can tell you many times it has saved them with several hours of work they would have lost. Simple math of hourly labor versus the cost of the product makes it an obvious good choice to purchase. And, I have had the occasional time when a backup failed and Undelete was a temporary stand in for the missing file. Once I discovered the product, I haven't had a file server without it."

DIANA SARTORIUS
MANAGER OF DEPARTMENT COMPUTING
UNIVERSITY OF WASHINGTON

"With Undelete we have no need to use backup tape to restore files. It is very helpful to us and we can use the time saved to do other things."

COLLINS REYES
IT MANAGER
MIRAMED PHILIPPINES GROUP, LLC

"The challenge is not when [users] delete but when they have no idea what they deleted. This is hard to restore when you don't know what to restore. We are not trying to take over our existing backups with Undelete but it does help us with these situations. Another benefit - we had a user that clicked and thought they removed a bunch of files but since they weren't in Undelete, I knew she didn't delete them but dragged them elsewhere and sure enough we were able to find that entire folder, not deleted but in a subfolder. So it helps us research those instances when we can tell the log is empty on the server end for that user. So two nice benefits to it."

ANONYMOUS BUILDING & MATERIAL SUPPLIER

"I have been using the Undelete product for years and I can tell you that I'm very happy with the product."

JASON LEI
SYSTEMS/NETWORK ADMINISTRATOR
IPS CORPORATION

"Undelete takes care of the deleted files as if nothing as ever happened. Basically one click to recover! Keep up the good work!"

MAYOSSÉ BOUPO
VOK DAMS CHINA

Undelete Customer Testimonials

"I give Undelete Server a 10 out 10 because it makes file/folder recovery so easy. In past jobs it has always been a great tool."

NICK KOSMAS
IT DIRECTOR
CSA FRATERNAL

"I am so satisfied with how Undelete works on retrieving deleted files!"

EARLJON DE CASTRO
SHERATON MANILA BAY

"Engineers have accidentally deleted very critical files on a network share. We've been able to quickly find/recover those files. In addition, the versioning capability has also been very valuable in that we could go back one or two (or more) versions. It's much better/faster than retrieving from a backup. Since backups are nightly, the last backup might not even have the file if it were created and deleted on the same day."

BOB SAUERS
EXECUTIVE DIRECTOR
PCTEST ENGINEERING LABORATORY INC.

"Undelete has been great for us. It saves us time to restore documents that have been deleted and it has been a "Life Saver" in many occasions."

NOEL ARRIOLA
DIRECTOR OF IT
UNIVERSAL ENGINEERING SCIENCE

"Undelete makes my job easier because it makes mistakenly deleted files more convenient to retrieve."

ANONYMOUS HOSPITALITY COMPANY

"The Undelete software is an absolute necessity, especially when users delete documents accidentally. The software helps me to recover documents in just a few seconds (compared to recovery from a backup)."

ANONYMOUS LAW FIRM

"We do nightly backups across campus. However, most of our user servers also run Undelete so we can quickly recover files that were deleted in the past few weeks and sometimes restore previous versions of files which have become corrupted. Generally, Undelete is our first line of protection."

MARK KLOPSCH
NETWORK ADMIN
COLLEGE OF FORESTRY AT OREGON STATE

"Restoring a file that was accidentally deleted from a network share only takes seconds thanks to Undelete 11."

SASKO ZDRAVEV
DIRECTOR OF IT
PLANNED PARENTHOOD

"By having a constant layer of data protection with Undelete, I don't have to worry about users deleting files accidentally."

ANONYMOUS ORGANIZATION

Undelete Customer Testimonials

“About Undelete... it is a life saver!”

JORDI MANI
SYSTEMS ADMIN
FUNDACIÓ AMPANS. SPAIN

“Undelete helped us recover CAD files when a large amount were accidentally deleted. It saved us time as we did not have to mount backup drives.”

JEFF HAFER
IT MANAGER
BATESVILLE TOOL & DIE

“We are very pleased with Undelete. It’s a great tool for our helpdesk people and the users are satisfied because their ‘lost files’ are restored quickly and correctly. It’s easy to install and easy to use.”

ANONYMOUS GOVERNMENT AGENCY

“Years ago we were a Novell shop and became dependent on the salvage utility. Once we moved to Microsoft, our users couldn’t understand why were unable to immediately restore their accidentally deleted files. Undelete gave us back that ability. Undelete has saved us time and makes my life much easier.”

ANONYMOUS GOVERNMENT AGENCY

“I use Undelete on Windows File Servers. It’s a very big product. Every time users ask me for help because a document has “disappeared” from the network, I can quickly recover the document and inform them who it was that pressed delete!!!!”

MASSIMO RUGGIERI
FOUNDER & CEO
ARCIPELAGO IT

“A network recycle bin is very important and Undelete Server has given us peace of mind knowing that we can recover files quickly. It has saved several hours worth of work when accidental file deletions or overwriting have happened.”

RAFAEL LEMUS
IT DIRECTOR
R. CHRISTOPHER GOODWIN & ASSOCIATES, INC.

“I have used Undelete several times to save ourselves from having to go to nightly backups, or for items that had been deleted that were recently created and would have never made it onto a backup job. I have also implemented it at my last job, as well as a few IT consulting clients that I manage. I am obviously a big fan.”

HILLEL ROKOWSKY
CHIEF TECHNOLOGY OFFICER
LEADING EDGE ADMINISTRATORS
